DETAILED ACTION

1. Claims 12 –31 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of pumps are necessary to enable movement of the pulp and oxygen through the pipe loop and necessary mixers must be present enable proper mixing and contact of oxygen and other pulping chemicals are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claim 12 should recite these critical and key components of the disclosed invention.

2. Claims 12-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 fails to recite the addition of oxygen and it is also incomplete since steps of mixing oxygen and other delignifying chemicals have been omitted thus rendering the claim incomplete.

Claim 12 also does not clearly state the relationship or how the first volume is related to the pipe loop.

3. The claims would be allowable if claim 12 is amended to obviate the above 35USC112 deficiencies.

4. The information disclosure statement filed 2/25/2002 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in
